

Title: Cannot resolve symbol 'security' while importing io.jsonwebtoken.security.Keys;

Post Body:

I was trying to build a project about API authentication using JWT. I have installed the io.jsonwebtoken package with version 0.9.1 in order to do that.

My pom.xml

```
<?xml version="1.0" encoding="UTF-8"?> <project xmlns="http://maven.apache.org/POM/4.0.0" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xsi:schemaLocation="http://maven.apache.org/POM/4.0.0 http://maven.apache.org/xsd/maven-4.0.0.xsd">
```

While I'm trying to import "io.jsonwebtoken.security.Keys" I'm getting this error: "Cannot resolve symbol 'security'".

I tried 0.6.0 but still no luck.

How can I fix this? Thanks.

Accepted Answer:

I have this configuration in my pom.xml. This worked for me. I removed the dependency as you have in the question and replaced it with below.

```
<dependency>
    <groupId>io.jsonwebtoken</groupId>
    <artifactId>jjwt-impl</artifactId>
    <version>0.11.5</version> </dependency>
```

**Edit: 27 Jan 2023**

Updated versions of the libs to the latest version 0.11.5 from earlier 0.11.1 in the answer.

Highest Rated Answer:

Based on <https://search.maven.org/search?q=fc:io.jsonwebtoken.security.Keys%20AND%20g:io.jsonwebtoken> (this is how you can get the list of artifacts with a specific groupId containing a specific class), you need at least 0.10.0 of jjwt-api
