

Title: Missing artifact org.springframework.cloud:spring-cloud-starter-openfeign:jar:3.0.3-SNAPSHOT

Post Body:

I am trying to add "spring-cloud-starter-openfeign" dependency to pom.xml

```
<dependency>
    <groupId>org.springframework.cloud</groupId>
    <artifactId>spring-cloud-starter-openfeign</artifactId>
```

But i am getting below error.

```
[INFO] Scanning for projects... [INFO] [INFO] [1m-----< [0;36mcom.cts:stock[0;1m >-----
```

After some findings from google i have added version like below

```
<dependency>
    <groupId>org.springframework.cloud</groupId>
    <artifactId>spring-cloud-starter-openfeign</artifactId>
```

But still the error is not resolved. Can some one help me with this ?

Below is my pom.xml

```
<?xml version="1.0" encoding="UTF-8"?> <project xmlns="http://maven.apache.org/POM/4.0.0"
    xmlns:xsi="http://www.w3.org/200
```

I have added the pom file. I am trying to create a feign client on one of my services in micro services project. I can't able to resolve this pom because of **spring-cloud-starter-openfeign** dependency. I am recently learning microservices, so can some one help me to resolve this pom file

Accepted Answer:

*Hi I finally fixed this issue by adding **spring-cloud-openfeign-core** which is below*

```
<dependency>
    <groupId>org.springframework.cloud</groupId>
    <artifactId>spring-cloud-openfeign-core</artifactId>
    <ve
```

Resolution:

I found this solution as error came on 4th line of pom file saying **"Missing artifact org.springframework.cloud:spring-cloud-openfeign-core:jar:3.0.3-SNAPSHOT"** after adding version for **spring-cloud-starter-openfeign** dependency.

Means Sping is searching for **openfeign-core** dependency after adding **spring-cloud-starter-openfeign**

So below is updated **pom.xml**

```
<?xml version="1.0" encoding="UTF-8"?> <project xmlns="http://maven.apache.org/POM/4.0.0"
    xmlns:xsi="http://www.w3.org/200
```

Highest Rated Answer:

The last release version is 3.0.2 not 3.0.3 See here <https://mvnrepository.com/artifact/org.springframework.cloud/spring-cloud-starter-openfeign/3.0.2>
