

Title: gitlab-runner locally - No such command sh

Post Body:

I have gitlab-runner installed locally.

```
km@Karls-MBP ~ $ gitlab-runner --version Version:      10.4.0 Git revision: 857480b6 Git branch:    10-4-stable GO version:  g
```

Docker:

```
km@Karls-MBP ~ $ docker --version Docker version 17.12.0-ce, build c97c6d6
```

.gitlab-ci.yml:

```
image: docker/compose:1.19.0  before_script:  - echo wtf  test:  script:  - echo test
```

Results:

```
km@Karls-MBP ~ $ sudo gitlab-runner exec docker --docker-privileged test WARNING: Since GitLab Runner 10.0 this command is mar
```

Don't really know what the issue is.

Accepted Answer: None

Highest Rated Answer:

It seems that the docker/compose image is configured with docker-compose as an entrypoint.

You can [override the default entrypoint](#) of the docker/compose image in your **.gitlab-ci.yml** file :

```
image:      name: docker/compose:1.19.0  entrypoint: ['']  before_script:  - echo wtf  test:  script:  - echo test
```
