

Title: How to integrate ReactJS with spring Boot

Post Body:

I want to integrate **ReactJS** with **Spring-boot** and **maven** but I don't know how.

I can use npm to install it but I don't know in which path I will do that.

```
npm init npm install --save react react-dom
```

Accepted Answer: None

Highest Rated Answer:

See [frontend-maven-plugin](#)

You should add something like this to your pom.xml file

```
<plugin>      <groupId>com.github.eirslett</groupId>      <artifactId>frontend-maven-plugin</artifactId>      <version>1.2</version>
```

There should be webpack.config.js and package.json together with pom.xml and the webpack is like this

```
var path = require('path'); var webpack = require('webpack'); var packageJSON = require('./package.json'); module.exports = {
```
