Title: spring-boot-maven-plugin:build-image fails with 400 Bad Request
Post Body:

I am trying to build a docker image for my basic Spring Boot application using the spring-boot-maven-plugin:build-image goal.

It fails with the below error:

```
[ERROR] Failed to execute goal org.springframework.boot:spring-boot-maven-plugin:2.4.0-M2:build-image (default-cli) on project
```

I have tried with both **Spring Boot 2.3.3.RELEASE** as well as **2.4.0-M2** and I get the same error.

I have Docker Desktop running on a Windows 10 machine.

```
$ docker version
```

Client: Docker Engine - Community Version: 19.03.12 API version: 1.40 Go version: go1.13.10 Git

Full stack trace:

```
[ERROR] Failed to execute goal org.springframework.boot:spring-boot-maven-plugin:2.4.0-M2:build-image (default-cli) on project
```

Accepted Answer: None
Highest Rated Answer:

Doing

docker volume prune

was resolved my issue.
