Title: Spring security oauth2 'dependencies.dependency.version' is missing for spring boot 2.0.3
Post Body:

I try to add dependency of spring security. This is my pom.xml

`<properties>                 <spring-boot.version>2.0.3.RELEASE</spring-boot.version> </properties>  <dependencyManagement>         <d`

I try with artifactId spring-security-oauth2, it said: 'dependencies.dependency.version' for org.springframework.security.oauth:spring-security-oauth2:jar is missing

but with spring 1.4.2.RELEASE, It work. What is the new spring security oauth2 maven repo for springboot 2.0.3.RELEASE? (without element) Thanks

Accepted Answer:

Error saying that you haven't defined version for `spring-security-oauth2`

You can use 2.3.3 version

`    <dependency>           <groupId>org.springframework.security.oauth</groupId>            <artifactId>spring-security-oauth2</art`
