Title: Spring Boot Integration test error of CIRCULAR REFERENCE :io.zonky.test.db.provider.ProviderException

Post Body:

I am working on Spring Boot Application that contains unit and integration test cases to check functionalities.

Docker is running with Podman and it working fine.

I am using POSTGRES database server that configured on my machine. But while running Integration test, the test are getting ignored with the error : CIRCULAR REFERENCE:io.zonky.test.db.provider.ProviderException: Unexpected error when preparing a database cluster; nested exception is java.lang.IllegalStateException: Could not find a valid Docker environment. Please see logs and check configuration

**Detailed Stack Trace :**

```
java.lang.IllegalStateException: Failed to load ApplicationContext        at org.springframework.test.context.cache.DefaultCache
```

I have tried many solution like updated to latest version on zonky :

```
<dependency>        <groupId>io.zonky.test</groupId>        <artifactId>embedded-database-spring-test</artifactId>        <version>2.1.
```

But it didn't worked.

Tried `@AutoConfigureEmbeddedDatabase(type = AutoConfigureEmbeddedDatabase.DatabaseType.POSTGRES, provider = ZONKY)`

Then also it throwing same error : CIRCULAR REFERENCE:io.zonky.test.db.provider.ProviderException: Unexpected error when preparing a database cluster

**Detailed Stack trace**

```
Caused by: io.zonky.test.db.shaded.com.google.common.util.concurrent.UncheckedExecutionException: io.zonky.test.db.provider.Pr
```

What can be more possible way to resolve the issue of tests?

Accepted Answer: None

Highest Rated Answer:

upgrading embedded-postgres to 2.0.0 should fix the issue

```
<dependency>          <groupId>io.zonky.test</groupId>          <artifactId>embedded-postgres</artifactId>          <version>2.0.0</ver
```
