Title: External properties file using Spring Boot and Docker

Post Body:

i cannot configure a Dockerfile for use external properties file with Spring Boot. This is my Dockerfile:

```
FROM java:8-jre  VOLUME /tmp /var/gpm/config ADD gpm-web-1.0.jar app.jar RUN bash -c 'touch /app.jar' ENTRYPOINT ['java','-cp'
```

And in my host i have this path to properties file : /var/gpm/config/application.properties

But, don't works.

UPDATE

i change Dockerfile by this:

```
FROM java:8-jre VOLUME /tmp ADD gpm-web-1.0.jar app.jar RUN bash -c 'touch /app.jar' ENTRYPOINT ['java','-Djava.security.egd=f
```

And run with this:

```
docker run -d -p 8080:8080 -v /opt/gpm/config/application.properties:/conf/application.properties --name gpm gpm-web:1.0
```

But, the file is take it like a folder:

```
root@b7349202b6d3:/# ls -la /conf/ total 8 drwxr-xr-x  3 root root  4096 May 18 16:43 . drwxr-xr-x 74 root root  4096 May 18 1
```

Accepted Answer: None

Highest Rated Answer:

I think you only need to mount the volume to the conf folder e.g.

docker run -d -p 8080:8080 -v /opt/gpm/config:/conf --name gpm gpm-web:1.0
