Title: docker-compose + spring boot few application don't connect
Post Body:

I create 2 spring boot application. ConnectToBd and ResourceCalculate

application.properties:

```
nsi.url=http://ip:port/odo/find/root/ bd_connect=http://ip:port/connect-to-bd/getdata?
```

Spring controller:

```
@PropertySource('application.properties') @RestController public class ResourceCalculateCntr {  @Value('${nsi.url}') private S
```

build with gradle

Dockerfile bdconnect and calculate. Example:

```
FROM openjdk:8 EXROSE 8080 ADD resourceCalculate.war resourceCalculate.war ENTRYPOINT ['java', '-jar', 'resourceCalculate.war'
```

docker build succesfull

then I use docker-compose:

```
version: '3'  services:  calc:    image: calculate    container_name: calc    ports:      - '2020:8080'    enviroment:
```

do docker-compose up and write: Creating done Then I enter in container: 'docker-compose exec calc sh' and 'ping connect' all okey But if I request webservice in browser I see response:

```
http://ip:port/odo/find/root/ connect
```

Why so?
